# Benchmark problems to tackle with EUROPA

## Constraint Programming

- [Constraint Programming Benchmark Library](#)

## Scheduling

- [ProGenMax](#) RCPSP problems
- [PSLIB](#) Various Scheduling problems
- [Scheduling Problems from ICAPS07](#) Benchmark Problems for Oversubscribed Scheduling

## International Planning Competition

- 2007 [paper](#) on comparing planners through their performance on these problems
- [IPC-5 \(2006\)](#)
- [IPC-4 \(2004\)](#)
- [IPC-3 \(2002\)](#)
- [IPC-2 \(2000\)](#)
- [IPC-1 \(1998\)](#)

## Combinatorial Optimization

- [INFORMS](#) links to OR problem instances
- [J.E. Beasley's OR Library](#)
- [Discrete Location Problems](#) at the Sobolev Institute of Mathematics
- [Solomon's VRPTW Instances](#)
- [The TSP site at Georgia Tech](#)

## Games/Puzzles

- [Sokoban](#)
- [Games Group](#) at U of Alberta

# Implementing a Native POCL solver for ANML

- [VHPOP](#)
- [CPT](#)

# Continuous integration server for EUROPA

- [Bamboo](#) Free for open source projects like us
- [Bitten](#) Integrated with Trac (see [example](#)). need to see if Java/Python slant is a problem for us.
- also, load EUROPA on [OhLoh?](#) to get their metrics/exposure

## Complexity Sites

- [Complexity Zoo](#)
- [A compendium of NP optimization problems](#)

## Related Systems

maybe we can have an intern perform a systematic comparison at some point :

- [ECLiPSe](#)
- [Comet](#)
- [Simpl](#) : see also a [presentation](#) on it
- [Choco](#)
